

MICHAEL M

RING SIZING GUIDE

ITEMS YOU WILL NEED

- Scissors
- Ruler
- Printer
- String or piece of paper
- Existing Ring (Optional)

1 cm = 10 mm

BEFORE YOU GET STARTED

Print this guide out and set the page scaling option to "None" in the Printer Dialog Box. This guide must be printed on an 8.5" x 11" paper.

To ensure accuracy, please use a ruler to measure the sample above. *It should measure exactly 2 centimeters.*

It is recommended to measure your finger when at their largest, typically in the evening. Please make sure your finger is dry.

Sizing can differ between a wide and narrow shank. Thicker bands will fit more snug. Your fingers on the dominant hand are typically larger.

MEASURE YOUR RING SIZE

Option 1:

- Wrap the string or piece of paper tightly around the widest part of the finger you want to measure.
- Mark where the end meets.
- Measure the length with the ruler and compare to the sizing chart on the right.

Option 2:

- If you already have a ring that fits the intended finger, place the ring over the circles to the right.
- Match the inside edge (diameter) of your ring to the circle nearest in size. *If the ring falls between two sizes, size up.*
