RING SIZING GUIDE

ITEMS YOU WILL NEED

- Scissors
- Ruler
- String or piece of paper
- Existing Ring (Optional)

BEFORE YOU GET STARTED

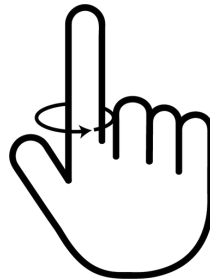

It is recommended to measure your finger when at their largest, typically in the evening. Please make sure your finger is dry.

Sizing can differ between a wide and narrow shank. Thicker bands will fit more snug. Your fingers on the dominant hand are typically larger.

MEASURE YOUR RING SIZE

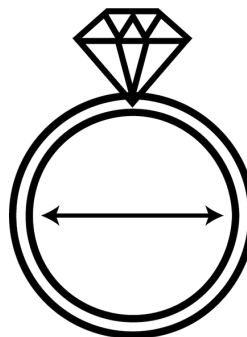

Option 1: String Method

- Wrap the string or piece of paper tightly around the widest part of the finger you want to measure.
- Mark where the end meets.
- Measure the length with the ruler and compare to the sizing chart on the right.

Option 2: Using Ring

- If you already have a ring that fits the intended finger, place the ring over the circles to the right.
- Match the inside edge (diameter) of your ring to the circle nearest in size. **If the ring falls between two sizes, size up.**

1 cm = 10 mm
